

BUILDING A GROWTH-FRIENDLY TAX ENVIRONMENT

DATA EXCHANGE AND SHARING

FTS OF RUSSIA

BUILDING A GROWTH-FRIENDLY TAX ENVIRONMENT

Value of Tax Data

The Federal Tax Service collects a large amount of data on the economic situation of the country (both business and individuals) on a real-time basis

Collected data has a unique value and should be used not only for tax purposes

Tax data should be used for public administration and business management (with regard to the tax secrecy requirements)

BUILDING A GROWTH-FRIENDLY TAX ENVIRONMENT

UNCOVERING HIDDEN POTENTIAL OF ONLINE-CASH REGISTERS

DATA SHARING

- Aggregated sales data map to help businesses be more competitive (geocheck)
- Open access to sales data to mitigate price distortions

AI APPLICATION

- Categorization of goods by name for certain product groups (food basket, pharmaceuticals, fuel)
- Identification of the type of economic activity of legal entities/sole proprietors using OCR
- Macroeconomic analysis with more reliable indication of the type of economic activity
- Proactive and timely support for businesses

WHOLE-OF-GOVERNMENT DATA EXCHANGE PLATFORM

BUILDING A GROWTH-FRIENDLY TAX ENVIRONMENT

CROSS-BORDER B2B DATA EXCHANGE

Objective

- Universal standards for cross-border data exchange
- Wide coverage of cross-border supply chains
- Common approach to regulation of cross-border data exchange

Risks and barriers

- Verification of the digital identification created in a foreign jurisdiction
- The existence of different formats of primary documents
- Different approach on tax administration

First steps

- Cross-border pilot showcases

BUILDING A GROWTH-FRIENDLY TAX ENVIRONMENT
