# PART TWO

Control program of tax return accuracy

### Control of tax return accuracy

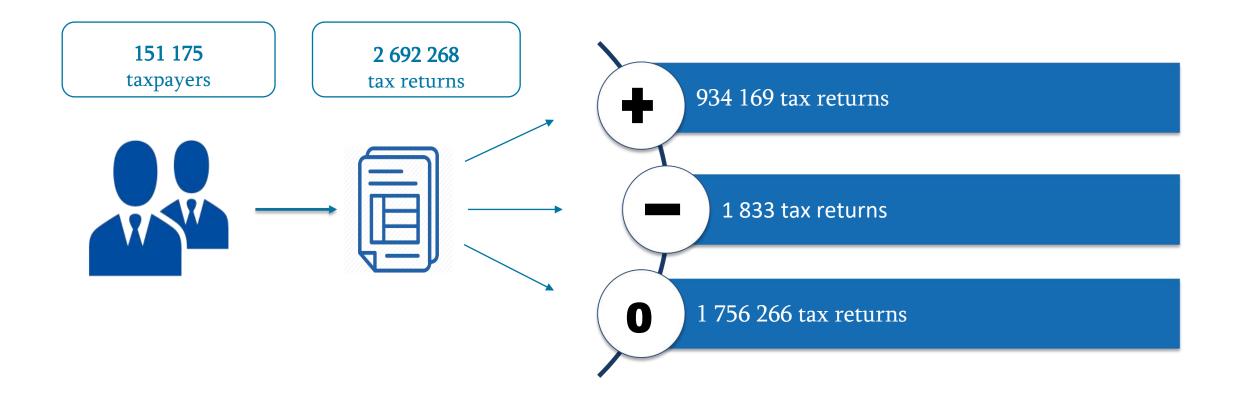

Assesses Withholding and monthly profit tax return accuracy based on predefined criteria

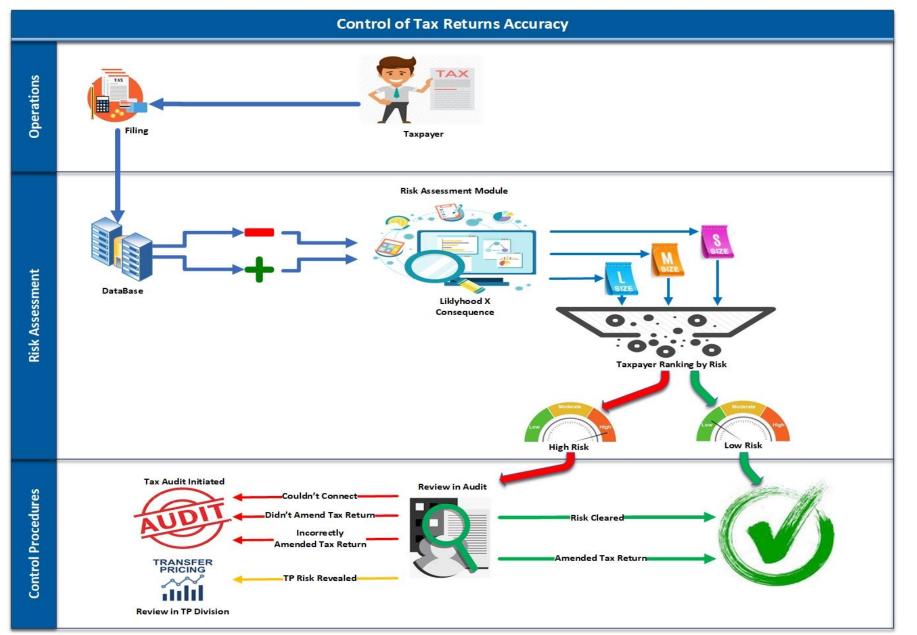

### Scope of the program:

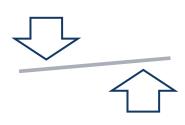

### Control of Tax Return Accuracy

### Traditional approach

- Risk Response Measures:
- Taking Inventory
- Tax Audit
- Cash machine control measures

### New approach

- Risk Response Measures:
- Proactive communication with TP
- Voluntary amendment of tax returns
- Tax audit as a last resort

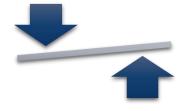

### Detection control

(Traditional approach)

Cons:

- Increased uncollected debt
- Tax Disputes
- Less effective use of resources

VS

**Prevention control** 

(New approach)

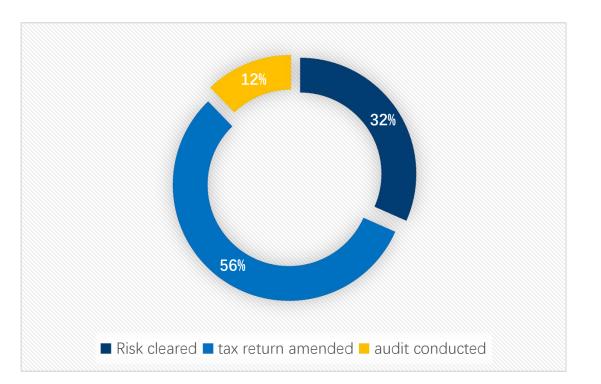

**Pros:** 

- Effective use of resources
- Decreased tax disputes
- Increased collection
- Decreased tax audits
- Real time risk assessment and control

### **Program Outcomes**

### 2023

- Effective cooperation with taxpayers
- Improved stakeholders management
- Voluntary compliance
- Effective risk assessment system

# Events planned to improve the program

- Extend Program scope to other taxes;
- Risk assessment using machine learning;
- Automate the communication process using a chatbot

## THANKS
